In 1997, Charles Frazier's debut novel *Cold Mountain* made the history of publication when Å boarded at the top of the New York Times best-seller list for sixty-one weeks, won numerous literary awards, including the National Book Award, and went on to sell over three million copies. Now, the beloved American epic returns, re-edited by Grove Press to coincide with the publication of Frazier's highly anticipated second novel, *Thirteen Moons*. Severely wounded and fatally disillusioned in the Petersburg fighting, a Confederate soldier named Inman decides to return to his home in the Blue Ridge Mountains in Ada, the woman he loves. His journey through the disintegrating South leads him to intimate and sometimes lethal conversations with slaves and thieves, bounty hunters and witches, both useful and malignant. At the same time, the intrepid Ada is trying to revive her father's abandoned farm and is learning to survive in a world where old certainties have been swept away. As it weaves their stories, *Cold Mountain* asserts itself as an authentic odyssey, extremely powerful, majestically beautiful and tenaciously moving. Thank you for your interest in our services. How long would you wait for your lover, if you didn't know if they were alive, and yourself changed almost beyond recognition? This Å is a beautiful, underrated, unsentimental odyssey of quiet nostalgia, endurance and transformation." This is a beautiful, discreet, inneristic odyssey of peaceful desire, resistance and transformation. "This journey will be the axis of my life." Inman's journey is located through hundreds of dangerous thousand, fleeing war and trying to get to where the life of him love, four years after having separated. "She had headed in a place where another order prevailed from what she had always known." Ada's journey takes place a few kilometers from her house. It is not a coincidence that the precious book by Inman is a travel book (while Ruby "had a profound distrust on the trip", also to the shops). The times are difficult, but at least Ada and Inman trust who and what they want. The structure of the novel alternates between the separate struggles of Ada and Inman to survive, with the background gradually provided by their reminiscences. Each of the chapters of Inman entails a dramatic, good or bad encounter, which sheds light on his character, as well as war and desert tests. Ada is 26 years old, orphan, almost indigent and tries to cope with a little land, but without staff or skill. Various time works well. Both Inman and Ada cultivate the art of really seeing: Inman is always attentive, noting every small sign in nature or behavior of the people who can report the danger (a shadow behind the leaves, a blade hidden in a hairstyle); Ada learns to see the signs of seasons, time, collection, birds and animals. The language is sometimes a little archaic, as it should be. The quotes are not used, but I don't really feel their absence: dialogue is usually preceded by a long dash. Although the background is the American civil war, I did not feel hindered by my relative lack of knowledge of the United States history. There were enough basic details to imagine daily life, but the And the war were external to the characters, and therefore for me as a reader. In contrast, Ruby has an encyclopaedic knowledge of such things, and thus she takes the lead in survival. Ruby is also guided by signs that Ada's preacher father, Monroe, would have dismissed as superstition. Ada "chose to view the signs as metaphoric... a way of being alert" so that "she could honor them". But a hundred pages later, she writes to her cousin in Charleston about how field work has changed her, "Should a crow fly over I mark it in all its details, but I do not seek analogy for its blackness... I suspect it is somehow akin to contentment." It's worth noting that the first chapter is titled "the shadow of a crow" and the last "spirits of crows, dancing".The Ending and the EpilogueTwenty pages from the end, it was so tender and understated and perfect that I had to pause. I was sure it would end badly, and I couldn't bear it.(view spoiler)[The reunion of Ada and Inman is wonderfully, but unsentimentally, done. He finds her, dressed like a man, hunting turkeys, rather than in the fine skirts he'd remembered. She doesn't recognise him, so he apologies and walks away. When she does recognise him (by his voice), there are no dramas, just tentative steps towards an unknown present and even less certain future. "No previous formula of etiquette seemed to apply." Even when left alone, they're unsure what to do - so Inman reads a passage from Bartram... and then does the washing up! But eventually they talk, "to rewrite even a shard of the past" as lover do "before they can move forward paired". Eventually, "The world was such a lonely place, and to lie down beside him, skin to skin, seemed the only cure."Then they plan their future. "Their whole lives stretched ahead of them" but also "youth was about over for them and what lay ahead was another country entirely, wherein the possibilities narrowed down moment by moment." It's all too good to be last. Inman is shot by Teague's gang. Ada gets to him in to hold him while he dies.This is a horrible symmetry with a much earlier hint of what happened to Ada's parents, who met and loved each other as children, were separated for years, and reunited happily, but only very briefly, before one of them died.The epilogue compensates for the tragedy of Inman's death by showing Ada and her daughter who live happily with Ruby, Ruby's husband, their children, and Ruby's reformed father. However, without that, the final scene would be touching and, slightly ambiguous, which I think I prefer. (hide spoiler) [Reminds Me Of (The links are to my reviews of these books.) The quiet stoicism, the comfort in literature, and the connection to the ground, reminded me of one of my two favorite books, Stoner.The almost literal power of saving books amidst disorder and deprivation is something Jeannette Winterson points out in Why be happy when you could be normal?.The harsh beauty of the mountains, coupled with love and desire, reminded me a little bit of Brokeback Mountain. The similarity of the title can be a factor, too.Quotes* "The first streak of misty dawn and [he] waited for the world to begin to shape itself on the outside".* "Nature...sometimes draws attention to its specific characteristics and recommends them for interpretation".* "Educated beyond the point considered wise for women" but "impracticable for life's demands."
